

Dean Mid Cap Value Fund

Summary Prospectus July 29, 2017

DEAN

Before You Invest

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund, including its statement of additional information (SAI) and most recent reports to shareholders, online at www.deanmutualfunds.com. You can also get this information at no cost by calling 888-899-8343 or by sending a written request to Dean Mid Cap Value Fund, c/o Ultimus Asset Services, LLC, P.O. Box 46707, Cincinnati, Ohio, 45246-0707. This Summary Prospectus incorporates by reference the Fund's entire prospectus and SAI, each dated July 29, 2017.

Investment Objective

The investment objective of the Dean Mid Cap Value Fund (the "Mid Cap Fund" or the "Fund") is long-term capital appreciation and, secondarily, dividend income.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Mid Cap Fund.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.90%
Other Expenses	0.86%
Total Annual Fund Operating Expenses	1.76%
Fee Waiver/Expense Reimbursement ¹	(0.66)%
Total Annual Fund Operating Expenses (After Fee Waiver/Expense Reimbursement)	1.10%

¹ The Fund's adviser contractually has agreed to waive its management fee and/or reimburse expenses so that total annual Fund operating expenses (excluding portfolio transaction and other investment-related costs (including brokerage fees and commissions); taxes; borrowing costs (such as interest and dividend expenses on securities sold short); acquired fund fees and expenses; fees and expenses associated with investments in other collective investment vehicles or derivative instruments (including for example option and swap fees and expenses); any amounts payable pursuant to a distribution or service plan adopted in accordance with Rule 12b-1 under the Investment Company Act of 1940; expenses incurred in connection with any merger or reorganization; extraordinary expenses (such as litigation expenses, indemnification of Trust officers and Trustees and contractual indemnification of Fund service providers)) do not exceed 1.10% of the Fund's average daily net assets through July 31, 2018. Each waiver or reimbursement is subject to recoupment by the adviser in the three years following the date the particular expense payment occurred, but only if such reimbursement can be achieved without exceeding the applicable annual limit in effect at the time of the expense payment or the reimbursement. This expense limitation agreement may not be terminated prior to July 31, 2018, except by the Board of Trustees.

Expense Example:

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The Example reflects the adviser's agreement to waive fees and/or reimburse expenses for one year only. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 year	3 years	5 years	10 years
\$112	\$490	\$892	\$2,019

Portfolio Turnover

The Mid Cap Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual operating expenses or in the Example above, affect the Fund's performance. During the most recent fiscal year, the Mid Cap Fund's portfolio turnover rate was 57% of the average value of its portfolio.

Principal Investment Strategies

The Fund primarily invests in equity securities of mid cap companies. The Fund considers "mid cap" companies to be those with market capitalizations similar to companies listed on the Russell MidCap® Value Index at the time of investment. As of May 31, 2017, the market capitalization of companies listed on the Russell MidCap® Value Index ranged from \$722.0 million to \$40.8 billion and the median was \$6.6 billion.

Using fundamental, bottom-up research, the Fund's portfolio manager utilizes a multi-factored valuation method to identify stocks of mid cap companies that he believes are undervalued at the time of purchase. To identify these companies, the Fund's portfolio manager looks for companies with earnings, cash flows and/or assets that he believes are not accurately reflected in the companies' market values. The portfolio manager also considers various ratios, including the price-to-earnings or price-to-book value ratios and whether the companies' securities have a favorable dividend and/or interest-paying history and whether such payments are expected to continue. The portfolio manager attempts to purchase the stocks of these undervalued companies and hold each stock until it has returned to favor in the market and the price has increased to, or is higher than, a level the portfolio manager believes more accurately reflects the fair value of the company.

The Fund seeks to preserve capital in down markets and to diversify its portfolio in traditional, as well as relative, value-oriented investments. The Fund may from time to time overweight its investments in certain market sectors.

Under normal circumstances, the Fund invests at least 80% of its net assets in equity securities of U.S. mid cap companies. This policy may be

changed only upon at least 60 days' advance notice to shareholders. Equity securities in which the Fund and underlying funds may invest include common stocks, securities convertible into common stocks (such as convertible bonds, convertible preferred stocks and warrants), equity real estate investment trusts ("REITs"), and master limited partnerships ("MLPs"). The Fund may also invest in high grade government bonds. The Fund may from time to time overweight its investments in certain market sectors.

Principal Risks

All investments involve risks, and the Fund cannot guarantee that it will achieve its investment objective. An investment in the Fund is not insured or guaranteed by any government agency. As with any mutual fund investment, the Fund's returns and share price will fluctuate, and you may lose money by investing in the Fund. Below are some of the specific risks of investing in the Fund.

- **Market Risk.** The prices of securities held by the Fund may decline in response to certain events taking place around the world, including those directly involving the companies whose securities are owned by the Fund; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency, interest rate and commodity price fluctuations. The value-oriented equity securities purchased by the Fund may not rise to the value anticipated by the portfolio manager and may even decline in value. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value.
- **Small and Mid Cap Risks.** Securities of companies with small or medium market capitalizations are often more volatile and less liquid than investments in larger companies. Medium and small capitalization companies may face a greater risk of business failure, which could increase the volatility of the Fund's portfolio.
- **Management Risk.** The portfolio manager's judgments about the attractiveness, growth prospects and value of a particular asset class or individual security in which the Fund invests may prove to be incorrect and there is no guarantee that individual companies will perform as anticipated.
- **Sector Focus Risk.** To the extent that the Fund focuses in one or more industry sectors, factors affecting those sectors could affect Fund performance.
- **REIT Risk.** The value of REITs can be negatively impacted by declines in the value of real estate, adverse general and local economic conditions and environmental problems. REITs are also subject to certain other risks related specifically to their structure and focus, such as: (a) dependency upon management's skills; (b) limited diversification; (c) heavy cash flow dependency; (d) possible default by borrowers; and (e) in many cases, less liquidity and greater price volatility.
- **Publicly Traded Master Limited Partnership Risk.** Investments in publicly traded master limited partnerships ("MLPs") are subject to various risks related to the underlying operating companies controlled by the MLPs, including dependence upon specialized management skills and the risk that the underlying companies may lack or have limited operating histories. The success of the Fund's investments also will vary depending on the underlying industry represented by the MLP's portfolio. For example, when the Fund invests in MLPs that invest in oil and gas companies, its return on the investment will be highly dependent on oil and gas prices, which can be highly volatile. Similarly, MLPs that invest in real estate typically are subject to risks similar to those of a REIT. Unlike ownership of common stock of a corporation, the Fund would have limited voting rights and have no ability annually to elect directors in connection with its investment in a MLP.
- **MLP Tax Risk.** MLPs, typically, do not pay U.S. federal income tax at the partnership level. Instead, each partner is allocated a share of the partnership's income, gains, losses, deductions and expenses. A change in current tax law or in the underlying business mix of a given MLP could result in an MLP being treated as a corporation for U.S. federal income tax purposes, which would result in the MLP being required to pay U.S. federal income tax on its taxable income. The classification of an MLP as a corporation for U.S. federal income tax purposes would have the effect of reducing the amount of cash available for distribution by the MLP. Thus, if any of the MLPs owned by the Fund were treated as corporations for U.S. federal income tax purposes, it could result in a reduction of the value of your investment in the Fund and lower income, as compared to an MLP that is not taxed as a corporation.
- **Fixed Income Securities Risk.** If interest rates increase, the value of any fixed income securities held by the Fund may decline. Fixed income securities are also subject to credit risk, which is the risk that the issuer of the security may default on payment of principal or interest.
- **U.S. Government Securities Risk.** It is possible that the U.S. Government would not provide financial support to its agencies or instrumentalities if it is not required to do so by law. If a U.S. Government agency or instrumentality in which the Fund invests defaults, and the U.S. Government does not stand behind the obligation, the Fund's share price or yield could fall. Securities of certain U.S. Government sponsored entities, such as Freddie Mac or Fannie Mae, are neither issued nor guaranteed by the U.S. Government.

Performance

The bar chart below shows how the Fund's investment results have varied from year to year. The table below shows how the Fund's average annual total returns compare over time to those of a broad-based securities market index. This information provides some indication of the risks of investing in the Fund. Past performance of the Fund is not necessarily an indication of how it will perform in the future. Prior to March 31, 2011 the Fund was known as the Dean Large Cap Value Fund and invested primarily in large cap securities, and the performance information below for time periods beginning before March 31, 2011 may have differed if the Fund had instead pursued its current mid cap investment strategy.

Total Return for the Calendar Year Ended December 31

During the period shown in the bar chart, the highest return for a quarter was 21.01% for the quarter ended June 30, 2009, and the lowest return for a quarter was -(22.21)% for the quarter ended December 31, 2008. The Fund's year to date return as of June 30, 2017 was 4.88%.

Average Annual Total Returns for periods ending December 31, 2016:

	1 Year	5 Years	10 Years
Dean Mid Cap Value Fund			
Return Before Taxes	20.65%	14.31%	4.63%
Return After Taxes on Distributions	20.53%	14.21%	4.50%
Return After Taxes on Distributions and Sale of Fund Shares	11.79%	11.51%	3.67%
Russell Midcap® Value Index¹	20.00%	15.70%	7.59%
Russell Midcap® Index¹	13.80%	14.72%	7.86%

¹ Effective 3/31/11, the Fund changed its investment strategies from Large Cap Value to Mid Cap Value and also changed its benchmarks from the Russell 1000® Value Index to the Russell Midcap® Value and Russell Midcap® Indices. Performance prior to 3/31/11 reflects the Fund's Large Cap Value investment strategies and, as a result, the Fund's 10 year returns may vary substantially from those of the Midcap indices.

After-tax returns are calculated using the historical highest individual federal income tax rates in effect and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or IRAs.

Current performance of the Fund may be lower or higher than the performance quoted above. Updated performance information may be obtained by calling (888) 899-8343 or accessed on the Fund's website at www.deanmutualfunds.com.

You may sell or redeem shares through your dealer or financial adviser. Please contact your financial intermediary directly to find out if additional requirements apply.

Tax Information

Each Fund's distributions are taxable and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred account, such as a 401(k) plan, individual retirement account (IRA) or 529 college savings plan. Tax-deferred arrangements may be taxed later upon withdrawal of monies from those accounts.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase a Fund's shares through a broker-dealer or other financial intermediary (such as a bank or trust company), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create conflicts of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend a Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
