INVESTMENT GOAL
The Fund seeks long-term capital growth.

FUND FEES AND EXPENSES
This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

ANNUAL FUND OPERATING EXPENSES
(expenses that you pay each year as a percentage of the value of your investment)

Management Fees 0.74%
Other Expenses 0.21%
Total Annual Fund Operating Expenses 0.95%
Less Fee Waivers and Expense Reimbursements* 0.00%
Total Annual Fund Operating Expenses 0.95%

* Oak Associates, ltd. (the “Adviser”) has contractually agreed for a period of one year from the date of this Prospectus to waive all or a portion of its fee for the Fund (and to reimburse expenses to the extent necessary) in order to limit total annual Fund operating expenses after fee waivers and/or expense reimbursements, if any, to an annual rate of not more than 1.25% of average daily net assets. This contractual fee waiver may only be terminated subject to approval by the Board of Trustees of the Trust.
Example
This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest $10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same and you reinvest all dividends and distributions.

Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<table>

<tr>
<td>10 Years</td>
<td>$1,166</td>
</tr>
</tbody>
</table>

PORTFOLIO TURNOVER
The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 12% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGY OF THE FUND
The Fund invests primarily in common stocks of U.S. companies that the Adviser believes possess prospects for growth that are underappreciated by the market. The Adviser generally does not base stock selections on a company’s size, but rather on assessment of its fundamental outlook. As a result, the Fund may own stocks of smaller-capitalization companies. The Fund invests primarily in common stocks of U.S. companies, but may, to a lesser extent, invest in equity REITs, common stocks of foreign companies and American Depositary Receipts (“ADRs”) that meet the investment criteria of the Fund. The Adviser’s investment process begins with an analysis of the economy and various macroeconomic factors, followed by an evaluation of sectors and industries. It then focuses on the most attractive companies in these areas based on qualitative and quantitative factors. The Adviser’s investment strategy often involves overweighting the Fund’s position in the sectors and industries the Adviser believes offer the best risk-reward; this can result in significant differences in weightings between the Fund and its benchmark.

The Adviser invests with a long-term focus and seeks to keep the Fund’s portfolio turnover to a minimum relative to its peers. The Adviser may sell a security if the reason for its original purchase changes or when it believes better opportunities are available.

The Fund has adopted a policy that it will invest at least 80% of its net assets, under normal circumstances, in equity securities. This policy may be changed by the Fund upon 60 days’ notice to shareholders.

PRINCIPAL RISKS OF INVESTING IN THE FUND
The Fund’s share price will fluctuate. You could lose money on your investment in the Fund and the Fund could also return less than other investments. The Fund is subject to the principal risks summarized below.

Equity Securities Risk: The Fund is subject to the risk that stock prices will fall over short or extended periods of time. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by these companies may decline in response to such developments, which could result in a decline in the value of the Fund’s shares.
Foreign Securities Risk: The Fund is subject to the risk that investing in securities of foreign (non-U.S.) companies may result in the Fund experiencing more rapid and extreme changes in value than a fund that invests exclusively in securities of U.S. companies, due to less liquid markets and adverse economic, political, diplomatic, financial, and regulatory factors. Foreign governments also may impose limits on investment and repatriation and impose taxes. Any of these events could cause the value of the Fund’s investments to decline. ADRs are securities that evidence ownership interests in a security or a pool of securities issued by a foreign issuer. The risks of ADRs include many risks associated with investing directly in foreign securities, such as individual country risk and liquidity risk.

Investment Focus Risk: Although the Fund is diversified, because the Fund may invest a significant portion of its assets in the sectors and industries which it believes offer the best risk-reward, poor performance or adverse economic events affecting one or more of these overweighted sectors or industries could have a greater impact on the Fund than it would on another mutual fund with a broader range of investments.

Large Cap Risk: Large cap risk is the risk that stocks of larger companies may underperform relative to those of small and mid-sized companies. Large cap companies may be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes, and also may not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

Management Risk: Management risk is the risk that a strategy used by the Adviser may fail to produce the intended results.

Market Risk: Market risk is the risk that the market value of a security may fluctuate, sometimes rapidly and unpredictably.

Mid Cap Risk: Mid cap risk is the risk that stocks of mid-sized companies may be subject to more abrupt or erratic market movements than stocks of larger, more established companies. Mid-sized companies may have limited product lines or financial resources, and may be dependent upon a particular niche of the market.

REITs Risk: REITs must satisfy specific requirements for favorable tax treatment and can involve unique risks in addition to the risks generally affecting the real estate industry. REITs are dependent upon the quality of their management, may have limited financial resources and heavy cash flow dependency, and may not be diversified geographically or by property type.

Small Cap Risk: Small cap companies may be more vulnerable than large cap and mid cap companies to adverse business or economic developments. Securities of such companies may be less liquid and more volatile than securities of larger companies and therefore may involve greater risk.
PERFORMANCE INFORMATION

The bar chart and the performance table below illustrate the risks and volatility of an investment in the Fund. Of course, the Fund’s past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future. Updated performance information is available at www.oakfunds.com or by calling 1-888-462-5386.

The bar chart shows changes in the Fund’s performance from calendar year to calendar year.

* After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

INVESTMENT ADVISER
Oak Associates, ltd.

PORTFOLIO MANAGERS
James D. Oelschlager, President of Oak Associates, Ltd.
Portfolio Manager of the Fund since 2019.

Robert D. Stimpson, CFA, CMT
Portfolio Manager of the Fund since 2019.

PURCHASE AND SALE OF FUND SHARES

The minimum initial investment in the Fund is $2,000 (or $1,000 with an Automatic Investment Plan). Each additional investment must be at least $25. You may purchase and sell shares in the Fund on a day when the New York Stock Exchange is open for business. Shares of the Fund may be purchased or redeemed directly through Oak Associates Funds or through your financial intermediary. For more information about buying and selling shares, refer to the section “Purchasing, Selling and Exchanging Fund Shares” on page 41 of the Prospectus or call 1-888-462-5386.
TAX INFORMATION
The Fund intends to make distributions that may be taxed as ordinary income or capital gains, except when shares are held through a tax-deferred arrangement, such as a 401(k) plan or individual retirement account. Shares that are held in a tax-deferred account may be taxed as ordinary income or capital gains once they are withdrawn from the tax-deferred account. For more information on distributions from the Fund, refer to the sections “Dividends and Distributions” and “Taxation of the Funds” on page 49 of the Prospectus.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES
If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and/or Adviser may pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
